4. 2025/0007/SE - C10A - Fishing

5. The Swedish Agency for Marine and Water Management regulations amending the Swedish National Board of Fisheries regulations (2004:25) on access to resources and control in the field of fisheries

6. Fish recipients (fresh fish)

7.

8. A fully automatic or semi-automatic sampling device shall be used for the sampling of unsorted catches over 10 tonnes.

A sampling tube, or gutter, shall be fitted to the pipe, or conveyor belt, before grading. When the tube, or gutter, is opened, a predetermined catch amount shall automatically be removed from the stream and then collected in a vessel.

In the absence of a mutual recognition clause, please justify why:

There is no requirement for the installation other than that the pump pipe, or gutter, be opened during the time it takes for a predetermined catch amount to automatically be removed from the flow of fish in the pipe, or conveyor belt, that leads the fish from the vessel to the factory.

9. The purpose of the draft regulations is to ensure that the samples to be taken while unsorted catches of fresh fish are pumped ashore, are of the same size regardless of who is carrying out the sampling.
