5. Draft Government Regulation on the List of Psychomodulatory Substances

6. The proposal adds 4 substances to the list of psychomodulatory substances

7.

8. The draft adds 4 substances in the list of psychomodulatory substances in accordance with Act No 321/2024, namely kratom, kratom extract, cannabis up to 1% THC and cannabis extract and tincture up to 1% THC.

The addition of these substances to the list will allow placing them on the market under strict regulatory conditions laid down in Act No 167/1998 on addictive substances because it has been established, on the basis of current scientific knowledge, that they do not pose a serious risk to public health or a risk of serious social impacts on individuals and society.

Keywords:

psychomodulatory substances

psychoactive substances

9. With the efficacy of Act No 321/2024 amending Act No 167/1998 on addictive substances and amending certain other acts, it will be possible from 1 January 2025, subject to compliance with the conditions laid down in the Act, to schedule substances in the group of scheduled psychoactive and psychomodulatory substances. This will allow the evaluation of these substances, ensure their limited availability, and thus protect health, especially of the particularly sensitive population of children, while preventing the criminalisation of the possession of these substances by natural persons. The scheduling of substances is therefore primarily aimed at protecting children and preventing the occurrence of intoxication, especially in young people.

The file of the Act No 167/1998, as effective from 1 January 2025, was inserted into the TRIS database,. The previous notification for Act No 167/1998 was made under No 2024/0652/CZ
