4. 2025/0735/HU - SERV60 - Internet services

5. Amendment to Government Decree No 707/2021 of 15 December on activities covered by the National

Construction Industry Inspection and Reporting System and on the Construction Industry Monitoring and Reporting System

6. On construction sites, the registration of persons entering and leaving the premises in the access control IT system will be expanded to include the registration of construction products (information society service).

7.

8. The draft extends the functionality of the state IT system "Construction Industry Monitoring and Reporting System" ("Glass Gate system") with the registration of the building materials entering, as well as the building materials, waste, and building debris removed from the construction sites concerned.

By making the quantity and quality of the building materials and construction products used in the construction projects transparent, it helps improve the quality of buildings and achieve the environmental, energy efficiency and climate goals.

The new functionality of "Glass Gate" will also provide valuable information on the quantity and fate of building and demolition waste or secondary raw materials generated on the construction site.

9. The expansion of the functionality of the Construction Industry Monitoring and Reporting System ("Glass Gate system") aims to increase transparency in the construction sector, in particular through the traceability of revenues, costs and the input materials used.

The amendment contributes to supporting data-based, informed decision-making by builders and main contractors.
