5. Technical Guideline for Building TSG-1-001: 2026 – Fire Safety in Buildings

6. Risks Associated with the consequences of fires in buildings

7.

8. This technical guideline has been updated to reflect new technical standards and advances in technology.

9. The technical guideline provides recommended technical solutions for reducing the risks associated with

the consequences of fires in buildings.

9a. The technical guideline sets out recommended technical solutions for fire safety as defined in Article 25 of the Building Act (Essential and Other Requirements), which, in terms of content, covers part of the basic requirements established under the EU Regulation on the marketing of construction products – Fire protection.

9b. The construction of buildings is not governed by harmonized EU legislation; this technical guideline refers to European standards, it does not constitute a restriction on the free movement of goods within the EU internal market.

9c. A regulatory framework in this field is essential to reduce the risk of death or serious injury to occupants of buildings and to people in their immediate surroundings.
