4. 2026/0393/HU - C50A - Foodstuffs

5. Product specification in the national quality scheme of High Quality Food (KMÉ) for water- and extract-based syrups

6. Water- and extract-based syrups

7.

8. A product specification for water- and extract-based syrups is added to the High Quality Food (KMÉ) national quality scheme.

9. The addition of further product specifications to the High Quality Food (KMÉ) quality scheme is intended to enable the indication of higher quality for the widest possible range of food products in order to properly serve customer needs and to enable producers to join the quality scheme with a variety of products.

9a. The product specification sets out compositional, technological and sustainability requirements for water- and extract-based syrups, which distinguish products that fulfil these requirements from products that comply only with the legal provisions and are of a quality that is typical of the market offer in general.

9b. The introduction of the product specification does not constitute a restriction for producers, but only an opportunity to distinguish higher quality products. The High Quality Food (KMÉ) quality scheme is open to any EU producer whose product meets the requirements of the product specification, without territorial restrictions.

9c. Adherence to the High-Quality Food (KMÉ) quality scheme is voluntary; therefore the introduction of the product specification does not impose an additional burden on operators in the agricultural sector. Water- and extract-based syrups, prepared according to higher quality requirements, have a positive impact on the overall supply on the market.
