4. 2026/0337/DE - B00 - CONSTRUCTION

5. Technical delivery terms and conditions for geotextiles and geotextile-related products on waterways [TLG], 2026 edition

6. The TLG apply to geotextiles and geotextile-related products.

7.

8. The TLG set out standard technical delivery terms and conditions and specifications for geotextiles and geotextile-related products which are used in the stabilisation of embankments and bottom stabilisers of

waterways, or in associated structures such as groins, guide walls, side embankments or side ditches, as filter, separation or protective layers, or for reinforcement purposes.

9. In line with technical developments (amended standards and regulations), the notified 2018/206/D edition of 15 May 2018 of the TLG needed to be revised. Regulation (EU) 2024/3110 of 27 November 2024 had to be taken into account.

9a. The document to be notified is relevant to calls for tenders in the field of transport water engineering and is addressed to the federal contracting authorities and potential contracting entities. It describes the state of the art for this area of application, thereby creating a level of safety for the construction company.

9b. The procedures described in the notified draft enable the use of construction products under the Construction Products Regulation and enable their application in the internal market. The non-introduction of the draft would, conversely, constitute a restriction of the internal market.

9c. There is no excessive burden on economic operators, as the document to be notified is a continuation of a provision that has already been introduced.
