5. Ministry of the Environment Decree on the type approval of shut-off valves for water installations in

buildings

6. Shut-off valves intended for the supply of drinking water and hot water and located in buildings and properties

7.

8. This Decree lays down requirements for the type approval of shut-off valves intended for conveyance of drinking water and hot water located in the building and property. The current Regulation (6/19) repeals the provisions concerning eligibility for the management of drinking water. In other respects, no changes would be made to the section.

9. The EU's new Drinking Water Directive (EU) 2020/2184 and its hygiene requirements have been implemented with legislation issued by the Ministry of Social Affairs and Health. Provisions in the Ministry of the Environment's legislation that overlap with the Drinking Water Directive and its national implementation must be repealed.

9a. The repeal of the provisions will have no impact, as hygiene requirements and compliance with them will be demonstrated with the procedure laid down in the Drinking Water Directive. Duplicate provisions on hygiene requirements are not allowed; it is therefore essential that they be repealed.

9b. The repeal of the provisions will have no impact, as hygiene requirements and compliance with them will be demonstrated with the procedure laid down in the Drinking Water Directive. Duplicate provisions on hygiene requirements are not allowed; it is therefore essential that they be repealed.

9c. The repeal of the provisions will have no impact, as hygiene requirements and compliance with them will be demonstrated with the procedure laid down in the Drinking Water Directive. Duplicate provisions on hygiene requirements are not allowed; it is therefore essential that they be repealed.
