4. 2025/0169/AT - I30 - Lifting machines and equipment

5. Ordinance of the Upper Austrian State Government, with which the Upper Austria Lift Ordinance 2010 is

amended

(Upper Austrian Lift Ordinance - Amendment 2025)

6. Passenger Lifts

7.

8. The principal content is the introduction of a provision on the improvement of the safety of existing lifts in Upper Austria, which falls under state law provisions in terms of competence.

Specifically, safety inspections are planned for the passenger lifts referred to in this amendment to the ordinance within a specified time frame and, if necessary, any retrofitting measures will be ensured.

9. Commission Recommendation 95/216/EC of 8 June 1995, OJ L 134, 20/06/1995, p. 37, on improving the safety of existing lifts laid the foundations for regular safety testing and possible retrofitting of lifts.

This recommendation was implemented by the Ordinance of the Federal Minister of Economic Affairs and Labour on the Safety Inspection and Possible Retrofitting of Lifts (STPAV), Federal Law Gazette II No. 442/2005, and by the Ordinance of the Federal Minister of Economic Affairs, Family and Youth on the Safe Operation and Modification of Lifting Systems (Lifting Systems Operation Ordinance 2009, HBV 2009), Federal Law Gazette II No. 210/2009.

However, these federal regulations do not cover lift systems that fall within the competence of the state regulations.

Following the example of other federal states, the present amendment is intended to implement Recommendation 95/216/EC on improving the safety of existing lifts in Upper Austrian State Law.

The essential content is therefore the introduction of a provision which enables this objective to be achieved by providing for safety inspections within a fixed timetable for the passenger lifts referred to in this amendment to the ordinance and by ensuring that any retrofitting measures are carried out where necessary.
