5. Proposal for an amendment to Decree-Law No 99 of 27 January 1992 on the implementation of Directive 86/609/EEC on the protection of the environment, and in particular of the soil, when sewage sludge is used in agriculture: the proposal concerns the following issues

6. Sewage sludge

7.

Directive (EEC) No 86/278 on the protection of the environment, and in particular of the soil, from the agricultural use of sewage sludge: Art. 12

8. The legislative proposal, which consists of a single article, concerns the provisions of Legislative Decree No 99 of 27 January 1992, which transposes Directive 86/278/EEC on the use in agriculture of sludge from the treatment of civil waste water and its assimilation. In particular, the legislative proposal aims to introduce specific quantitative indicators in order to integrate the condition contained in the definition of 'treated sludge' in Article 2(1)(b) of the aforementioned Legislative Decree, relating to the reduction of the fermentable power of the sludge subjected to treatment.

9. There are no specific provisions in supranational legislation with clear technical parameters for determining the reduction of the fermentable power of sewage sludge.

This situation creates difficulties for industry operators in terms of unambiguously identifying the appropriate parameters to integrate the fulfilment of the condition described above. The regulatory proposal in question, therefore, aims to overcome these critical issues.
