5. ROYAL DECREE XXX AMENDING ROYAL DECREE 505/2013 OF 28 JUNE 2009 REGULATING THE

USE OF THE 'AUTOCHTHONOUS BREED' LOGO ON PRODUCTS OF ANIMAL ORIGIN.

6. Products of animal origin from animals of the autochthonous breeds included in the Official Catalogue of Livestock Breeds of Spain when these animals or their parents are registered in the corresponding stud-book

7.

Regulation (EU) No 1169/2011 on the provision of food information to consumers: Articles 40, 43, 44 and 45
Through the labelling of products, the "autochthonous breed" logo provides information about their racial origin. The distinctive sign is accompanied by the name of the autochthonous breed to which the producing animals belong and under which they or their parents are registered in the corresponding stud-book

8. Since Royal Decree 505/2013 of 28 June which regulates the use of the "autochthonous breed" logo in products of animal origin, the accumulated experience has reflected the possibility of improvement in the regulation of this concept. This standard introduces updates and modifications aimed at clarifying the concepts of labelling and of products of autochthonous breeds; eliminates the obstacle represented by the obligation for associations managing the same breed to form secondary associations and includes modifications to give greater protection to the autochthonous breed logo in its use by operators and in advertising activities; lifts the restriction on marketing when there is a PDO or PGI registered in the Community register, which contains or consists of the name of an autochthonous breed, of products labelled with the autochthonous breed logo only to operators covered by that PDO or PGI, and only on the product that complies with the corresponding specifications and covers the product of autochthonous breed, without undermining the compatibility of the use of the autochthonous breed logo with other labelling schemes and without prejudice to Regulation (EU) 2024/1143 of the European Parliament and of the Council of 11 April 2024. Finally, changes are made to the frequency of verification tasks on the correct application of the specifications for use of the autochthonous breed logo by the holders of those specifications.

9. 1. Need to introduce updates to the regulatory references and amendments aimed at clearly and precisely defining the concepts of labelling and products of autochthonous breed. 2. Need to remove the obstacle posed by the obligation for associations managing the same breed to form secondary associations, leaving it an option at their choice. 3. Need for the provision obliging that where there is a PDO or PGI that contains or consists of the name of an indigenous breed, only operators covered by that PDO or PGI may use the logo bearing the name of that breed, and only on the product that complies with the corresponding specifications and covers the product of autochthonous breed. 4. Need for changes to the frequency of verification of the correct application of the specifications for the use of the autochthonous breed logo.
