5. The Swedish Civil Contingencies Agency's Regulations on the handling of flammable gases and flammable aerosols.

6. Gas and aerosol dispensers

7.

8. The Swedish Civil Contingencies Agency (MSB) has several regulations on flammable goods based on the Act (2010:1011) on flammable and explosive goods (LBE). The regulations lay down, inter alia,

requirements on how the handling of flammable gas is to be designed, as well as on the storage and placement of containers with flammable gas. The purpose is to obstruct, prevent and restrict accidents and damage to life, health, the environment or property that may arise from fire or explosion caused by flammable gases. The proposal is an update of the rules governing the handling of flammable gas and flammable aerosols, MSBFS 2020:1.

9. By virtue of Section 25 of the Ordinance (2010:1075) on flammable and explosive goods (FBE), the Swedish Civil Contingencies Agency is authorised to provide for the handling of flammable goods. Pursuant to Section 25.1.7, the MSB may issue regulations on the matters which are referred to in Section 36.5 to 14 of the Act (2010:1011) on flammable and explosive goods, LBE. The MSB's authorisation also allows regulations for transmission lines (pipelines) for hydrogen pursuant to Section 25.1.7 of the FBE, Section 10 of the LBE, to be governed by the MSB. Such a Regulation for natural gas pipelines, MSBFS 2009:7, has previously been issued on the basis of Section 41 of the former FBE (1988:1145) and Section 6 of the former LBE (1988:868) on flammable and explosive goods. No corresponding regulations for hydrogen have been issued by MSB. These rules at issue governing the handling of flammable gas may, to some extent, be considered relevant for hydrogen transmission pipelines, but these have nevertheless been excluded because they do not comprehensively regulate the safety aspects of pipelines. However, the Act (2010:1011) on flammable and explosive goods contains safety requirements, e.g. Sections 6–11, which always apply, although at a more comprehensive and less detailed level.
