5. Swedish Energy Agency Regulations (STEMFS 2025:XX) on reporting under the Fuel Act and environmental information on fuels

6. Fuel

7.

8. The regulation is a new regulation that replaces two previous regulations (both of which have previously been notified to the European Commission).

The regulation describes what fuel suppliers must report to the Swedish Energy Agency every year and how greenhouse gas emissions are to be calculated for the fuel products. The regulations also set out detailed rules for how environmental information is to be declared both at filling stations and on websites.

Compared with previous regulations, the calculations of greenhouse gas emissions from fossil components used for reporting environmental information have changed. The calculations have been simplified by reducing the number of categories for fossil components.

9. The purpose of the regulation is to regulate in detail how fuel suppliers shall report the environmental and climate performance of different fuels in accordance with the Fuel Ordinance.
