Communication from the Commission - TRIS/(2026) 0320

Directive (EU) 2015/1535

Notification: 2026/0047/BG

Notification of a draft text from a Member State

Notification – Notification – Notifizierung – Нотификация – Oznámení – Notifikation – Γνωστοποίηση – Notificación – Teavitamine – Ilmoitus – Obavijest – Bejelentés – Notifica – Pranešimas – Paziņojums – Notifika – Kennisgeving – Zawiadomienie – Notificação – Notificare – Oznámenie – Obvestilo – Anmälan – Fógra a thabhairt

Does not open the delays - N'ouvre pas de délai - Kein Fristbeginn - Не се предвижда период на прекъсване - Nezahtuje prodlení - Fristerne indledes ikke - Καμμία έναρξη προθεσμίας - No abre el plazo - Viivituste perioodi ei avata - Määräaika ei ala tästä - Ne otvara razdoblje kašnjenja - Nem nyitja meg a késésekét - Non fa decorrere la mora - Atidējimai nepradedami - Atlikšanas laikposms nesākas - Ma jiftaħ il-perijodi ta' dewmien - Geen termijnbegin - Nie otwiera opóźnień - Não inicia o prazo - Nu deschide perioadele de stagnare - Nezačína oneskorenia - Ne uvaja zamud - Inleder ingen frist - Ní osclaíonn sé na moilleanna

4. 2026/0047/BG - B00 - CONSTRUCTION

5. Draft Regulation amending and supplementing Regulation No. RD-02-20-8 of 2013 on the design, construction and operation of sewage systems

6. The draft introduces an overall change to the current methodology for determining the rainwater amount in the hydraulic calculation of gravity sewage networks from Annex 2 to Regulation No. RD-02-20-8 of 2013. This methodology is used for

7.

8. The draft aims to:

- introduce a new method to determine the design rainwater intensity by dividing the country into 12 zones and to determine the design rainwater intensity using 12 formulas for this purpose;

- fill the gap in Regulation No. RD-02-20-8 of 2013, by including in the Regulation an algorithm for creating three types of hyetographs based on the IDF analytical curves derived as a result of the study and research of the available database of rainfall intensity measurements in Bulgaria.

9. The draft Regulation is based on in-depth research and analysis of the information regarding the rainfall parameters in the country with a view to updating the methodology for determining the design rainwater in the design of sewage systems. The existing methodology uses data and formulas for determining the design rainwater that have last been updated more than 40 years ago. According to the existing methodology, the country is divided into two zones (I and II) whose geographical boundaries are not clearly defined, and in recent years the experts have been making assumptions in their research (based on the annual course of precipitation and the spatial distribution of potentially dangerous precipitation) that there are more than two precipitation regions in Bulgaria.

10. References of the Basic Texts: Basic texts have been forwarded within the framework of previous notifications:
