5. Amending Order as regards products used for the cleaning of materials intended to come into contact with foodstuffs

6. Cleaning products for materials and objects intended to come into contact with foodstuffs

7.

8. This text adds three constituents to the positive list annexed to the Order of 8 September 1999, as amended following a favourable opinion from ANSES, corrects the restriction applicable to a constituent and adds one constituent which was erroneously removed when the text was last amended.

This text also adds a constituent to the positive list of the Order of 25 November 1992 and updates the test conditions for the verification of conformity of silicone elastomer materials and articles.

This text introduces amendments to the Order of 5 August 2020 on rubber materials and articles intended to come into contact with foodstuffs.

This text repeals the Order of 30 January 1984 on materials and articles containing vinyl chloride monomer and intended to come into contact with foodstuffs, the provisions of which have been incorporated into EU Regulation No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with foodstuffs.

9. This text makes it possible to take account of the latest scientific opinions of the French Agency for Risk Assessment (ANSES) by including in the positive lists of two texts (concerning cleaning products and rubber elastomers) new substances considered safe by ANSES for these uses. This text also makes it possible to correct errors of form detected in the three amended texts.
