5. Decree of the Flemish Government amending the Flemish Environmental Permits Regulation (VLAREME)

of 28 October 2016, as regards the application of artificial fertilisers

6. Description of how artificial fertilisers are to be applied

7.

8. The Manure Decree of 22 December 2006 stipulates that when applying artificial fertiliser to the outer edge of a plot of land, an edge spreader is to be used to apply solid artificial fertilisers, while a device equipped with drift-reducing technology is to be used to apply liquid artificial fertilisers, whereby the authority to define the requirements that such edge spreaders and drift-reducing technology are to meet is delegated to the Flemish Government, as is the authority to determine equally-effective alternatives for application. This decree sets out the specifics of this delegation.

9. The technologies in question are necessary for the effective and environmentally-sound application of artificial fertilisers.
