4. 2026/0004/LU - N00E - ENERGY CARRIER

5. Bill concerning the operation of heat pumps

6. To specify the arrangements for the installation, acceptance, periodic inspection and decommissioning of heat pump installations

7.

8. This Act shall apply to stationary heat pump installations used to regulate the indoor climate of buildings, irrespective of their heat output.

The purpose of this bill (hereinafter 'PL') is to lay down the requirements for placement (installation), acceptance (verification whether the installation has been carried out correctly), periodic inspection (to assess the proper functioning) and decommissioning (to ensure that the refrigerant is removed appropriately) of heat pump installations that are used to regulate the indoor climate of buildings.

9. The purpose of this bill (hereinafter 'PL') is to lay down the requirements for placement (installation), acceptance (verification whether installation has been carried out correctly), periodic inspection (to assess the proper functioning) and decommissioning (to ensure that the refrigerant be disposed of appropriately) from heat pump installations that are used to regulate the indoor climate of the buildings.

This bill's implementing regulation is the draft Grand Ducal regulation on the procedures for the operation of heat pumps ('PRGD') which specifies the relevant elements of the acceptance, periodic inspection and declaration of decommissioning.

Thus, the HGV and PRGD have the following objectives:

- to protect operators by ensuring that heat pump installations in the Grand Duchy are carried out correctly;
- to define a general framework for installers and controllers by defining the technical requirements of heat pump installations;
- to protect the environment by regularly checking the refrigeration circuit;
- to define the requirements for the planning and use of installations to ensure high energy efficiency.

In Luxembourg, installations used for the production of heat and cold in buildings are currently governed by the following provisions:

- the amended Grand-Ducal Regulation of 27 February 2010 concerning gas installations (hereinafter 'RGD gas');
- the amended Grand-Ducal Regulation of 7 October 2014 on combustion plants fuelled with solid or liquid fuel with a rated useful output exceeding 7 kW and less than 1 MW (hereinafter "RGD heating");
- the amended Grand-Ducal Regulation of 24 April 2018 on the limitation of emissions from medium combustion plants (hereinafter "RGD MCP");
- the amended Grand Ducal Regulation of 22 June 2016 relating to a) the inspection of refrigeration equipment, air conditioning and heat pumps using refrigerant fluids from HFCs, HCFCs or CFCs; b) the inspection of air conditioning systems (hereinafter referred to as "RGD leaks").
