4. 2026/0154/FI - B00 - CONSTRUCTION

5. Draft Decree of the Ministry of the Environment on energy performance requirements for certain technical

building systems

6. Does not apply directly to any product.

7.

8. The decree of the Ministry of the Environment would set minimum energy performance requirements for certain technical building systems. The decree would repeal the current corresponding decree (decree of the Ministry of the Environment on energy performance requirements for certain technical building systems 718/2020).

The decree would implement the requirements of European Parliament and Council Directive (EU) 2024/1275 on the energy performance of buildings (recast) concerning self-regulating devices, building automation and control systems, on-site renewable energy generation systems, and energy storage.

The aim of the decree is to promote the energy-efficient operation of technical building systems, ensuring indoor environmental quality and reducing the environmental impact of buildings.

The decree would establish minimum energy performance requirements for certain technical building systems. The requirements would concern building automation and control systems, on-site renewable energy production, energy storage, and self-regulating devices. The requirements would apply to the construction of new buildings, renovation and alteration work of existing buildings, and changes in the use of buildings.

9. The decree amendment would contribute to the implementation of the recast Energy Performance of Buildings Directive (EU) 2024/1275.
