5. Draft Government Proposal to Parliament for an Act amending the Act on equipping buildings with recharging points and recharging point capabilities for electric vehicles and automation and control systems

6. Does not concern any product directly.

7.

8. The proposal recommends amending the Act on equipping buildings with recharging points and recharging point capabilities for electric vehicles and automation and control systems, in accordance with the requirements of the Directive. The Act would lay down requirements, in accordance with the Energy Performance of Buildings Directive, for buildings to be equipped with charging points and recharging point capabilities for electric vehicles, as well as bicycle parking spaces. The requirements would apply to new buildings and buildings undergoing major renovation, and, in the case of non-residential buildings, to existing buildings as well.

The Act would lay down a requirement to install an automation and control system in buildings in accordance with the Directive.

9. The legislative amendment would contribute to the implementation of the recast Energy Performance of Buildings Directive (EU) 2024/1275.
