4. 2026/0101/AT - B10 - Construction materials

5. Ordinance of the Salzburg Regional Government adopting a Salzburg Building Technology Ordinance and amending the Salzburg Lifting Systems Operation Ordinance

6. Building Products

7.

8. Declaration of commitment of the new OIB Directives 2023 (with the exception of OIB Directive 6, which will take place at a later date)

9. The new Building Technology Ordinance primarily serves to explain the binding nature of the 2023 OIB Guidelines for mechanical strength and stability, fire protection, hygiene, health and environmental protection, safety in use and accessibility, and sound insulation. The OIB guidelines are a central component of the building regulations in Austria. They serve to harmonise the building technology specifications of the federal states and form the basis for legally compliant and uniform implementation. In addition, Art I redefines the building technology requirements for bicycle parking spaces with the aim of reducing construction costs and integrates them into the Building Technology Ordinance. The building technology requirements for density bonuses pursuant to Section 9, Paragraph 1b, of the 1997 Building Inspectorate Act are also integrated.

The purpose of the amendment to the Lifting Systems Operation Ordinance serves to update the references to regulations and federal provisions.

10. Reference to the basic texts: The basic texts were submitted as part of a previous notification:
