4. 2026/0102/FI - T40T - Urban and road transport

5. Draft Regulation on the assessment criteria for the periodic roadworthiness testing of vehicles

6. Vehicle categories M, N, O, L from the periodic roadworthiness testing of vehicles

7.

8. By way of this Regulation and pursuant to the Vehicles Act (82/2021), the Finnish Transport and Communications Agency lays down more detailed provisions on the objects to be inspected and the inspection procedures to be followed during the periodic roadworthiness testing of vehicles, the classification of faults and defects observed during the testing, and the contents of the inspection certificate.

9. The draft Regulation proposes an amendment to the existing Regulation so that it would reflect the amendments to the Vehicles Act included in the Government Proposal to Parliament for an Act amending the Act on Transport Services and for related Acts (GP 15/2026). According to the proposed amendments to the Vehicles Act, a vehicle used as a taxi must be equipped with a taximeter that meets the requirements of the Measuring Instruments Act. It is also proposed that special taxi signs be laid down in the Vehicles Act for vehicles used as taxis, while also adding to the Vehicles Act that the prerequisites for the use of taxi signs should be reviewed during the periodic roadworthiness testing of a vehicle. The mandatory use of a taximeter and a review conducted during the roadworthiness test of the prerequisites for using a taxi sign should also be considered in the Regulation of the Finnish Transport and Communications Agency on the assessment criteria for the periodic roadworthiness tests of vehicles. Additionally, the provision is amended to take account of the entry into force of the Euro 7 emission requirements, and inconsistencies in the current provision are clarified as regards to the evaluation of tyre and windscreen defects.
