5. Draft Regulation of the Minister for Digital Affairs on technical and operational requirements for digital radio receivers

6. Digital radio receivers

7.

8. The draft regulation lays down the technical and operational requirements for digital radio receivers. The draft regulation takes into account the Digital Radio Receiver Profiles recommendation (regarding standard and multimedia receiver profiles) issued by the WorldDAB Forum on 31 March 2020. The draft regulation generally does not introduce any additional requirements beyond the above-mentioned recommendation, which has only been supplemented with the recommended requirements for handling announcements. The draft regulation is intended to provide guidance both to broadcasters and to manufacturers and importers of DAB+ radio receivers on what conditions must be met and how to design receivers in order to ensure a minimum of interoperability that guarantees error-free transmission.

9. The draft regulation is issued in order to implement the statutory authorisation referred to in Article 406(7) of the Act of 12 July 2024 – Electronic Communications Law (Journal of Laws, item 1221) and fulfils the requirements of Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36; OJ L 334, 27.12.2019, p. 164; OJ L 419, 11.12.2020, p. 36; OJ L 137, 22.4.2021, p. 1 and OJ L 333, 27.12.2022, p. 80) in the field of interoperability for car radio receivers.
