4. 2025/0353/DE - B00 - CONSTRUCTION

5. BAW Code of Practice on sealing of expansion joints (MAB), 2025 edition

6. The BAW-MAB takes into account the updates to the standards in the area of elastomer waterstops as well as the practical experience gained in new constructions, construction in existing buildings and the reinforcement of expansion joints.

7.

8. The BAW-MAB applies to the sealing of expansion joints between concrete structural components and

between concrete and steel structural components in the new construction and repair of hydraulic structures, as well as to construction in existing buildings.

9. The BAW-MAB is being introduced for the first time due to the updates to the standards for construction products made of elastomer and plastic. For example, in 2019 a new standard part, DIN 7865-4, for replaceable clamping waterstops was introduced in the DIN 7865 series of standards for elastomer waterstops for sealing joints in concrete, which was first published in 1982, as part of the update to the standard, which is also relevant for the repair of expansion joints. Products for this sector had not yet been regulated and therefore could not be used on federal waterways.
