8. The regulation describes the processes for the production and handling of alcoholic cocktails as well as the raw and other materials used in their production, and establishes the requirements imposed thereon.

9. Taking into account the new requirements of European Union regulations and the development of technological innovations, the draft specifies the technological processes and raw materials that can be used as well as the labelling requirements, adjusts the qualitative indicators and their deviations from those specified in the recipe, defines the concept of non-alcoholic cocktails, and updates other concepts. Taking into account the definition of an alcoholic beverage provided in Article 2(1) of the Republic of Lithuania Law on Alcohol Control and the provisions of Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011, the terms used regarding alcohol concentration by volume have been clarified. Other amendments of a corrective nature have also been made.
