4. 2025/0413/RO - B00 - CONSTRUCTION

5. Standard for hot recycling of asphalt mixtures in fixed, semi-mobile, and mobile mixing plants. Code DD 509-2024

6. The regulation shall apply to the maintenance of public roads of technical classes III-V and streets of categories II-IV, as well as to the maintenance and repair of roads and streets.

7.

8. The regulation shall be addressed to all the stakeholders defined by Law No 10/1995 on quality in construction, republished, with subsequent amendments and completions, during the design, execution and acceptance stages of the construction works.

The regulation refers to the quality conditions for materials and layers executed through hot recycling.

The characteristics of hot-recycled asphalt mixtures are aligned with the performance requirements set out in the "Standard for hot asphalt mixtures: Technical conditions for design, preparation, and commissioning. Code AND 605-2016", with subsequent amendments and completions.

Hot recycling in fixed, semi-mobile, or mobile mixing plants consists, in principle, of preparing asphalt mixtures using reclaimed asphalt and additional materials (natural aggregates, filler, bitumen, rejuvenating agents, and additives) in asphalt mixing plants intended for this purpose.

This regulation shall be correlated with the "Standard for hot asphalt mixtures: Technical conditions for design, preparation, and commissioning. Code AND 605-2016", regarding the performance requirements for the quality of layers executed using hot recycling technology (for base and binder layers), as the performance of the recycled mixture complies with SR EN 13108-1.

Keywords: recovered mixture/asphalt, recycled asphalt mixture, hot recycling, fixed/semi-mobile/mobile mixing plants, added natural aggregates, bitumen rejuvenator, etc.

9. The revision of the regulation "Standard for hot recycling of asphalt mixtures in fixed plants. Code DD 509-2003" was required for the following purposes:

- update and specify the "Reference documents" referred to in the technical regulation;
- align certain provisions in the technical regulation with other legal and regulatory acts in the field of road transport infrastructure, for example with the "Standard for hot asphalt mixtures. Technical conditions for design, preparation, and commissioning", Code AND 605-2016", with its subsequent amendments and completions;
- introduce modern asphalt mixing plants, including mobile and semi-mobile units;
- introduce specific notations for hot-recycled asphalt mixtures;
- define performance criteria and quality conditions for the recycled hot mixture, including commissioning and quality acceptance of the executed layers.
