4. 2025/0750/LT - C50A - Foodstuffs

5. Draft amendment to Order No 3D-351 of 20 May 2022 of the Minister of Agriculture of the Republic of Lithuania 'On approval of the rules of the National Food Quality System and recognition of some orders of the Minister of Agriculture as invalid'

6. Products manufactured under the National Food Quality System and the certification thereof.

7.

8. The ration of birds reared in accordance with Annexes 4 and 7 to the Rules of the National Food Quality System (hereinafter referred to as the 'NQP Rules') is expanded to include, in addition to grains, leguminous crops, meal and oilcake in the feed formula.

The project expands the provisions of Annex 6 to the NQP rules, allowing for the controlled and justified (in mandatory compliance with the requirements of Annex 6, point 8 of the NQP rules) use of plant protection products in protected cultivation systems.

The provisions of Annex 6 to the NQP rules are supplemented by a reference to cultivated edible mushrooms, excluding wild mushrooms.

Amendments are also made to the text of Annexes 1 and 10 to the NQP rules by replacing the obsolete term 'combat against diseases and pests' with the term 'control of diseases and pests'.

9. The project was developed with a view of expanding the ration of birds reared in accordance with Annexes 4 and 7 to the NQP rules to include, in addition to grains, leguminous crops, meal and oilcake in the feed formula. Such a modification would encourage the use of sustainable local raw materials in the production of feed and to increase flexibility in the recipe of the feed.

Since, in certain cases, biological plant protection products do not provide sufficient protection against the spread of diseases and pests to plants cultivated in a protected environment and the risk of loss of yields becomes particularly high, the project proposes to extend the provisions of Annex 6 to the NQP rules by allowing the controlled and justified use of other plant protection products in protected cultivation systems. The provisions of Annex 6 to the NQP rules are supplemented by a reference to cultivated edible mushrooms, because although these organisms do not belong to plants in taxonomic terms, from an agronomic and production process perspective, cultivated edible mushrooms are equivalent to vegetable crops cultivated in a protected environment (controlled growing conditions, substrates, harvest cycles). The EU Combined Nomenclature classifies them as 'edible vegetables' and their inclusion in Annex 6 to the NQP rules is therefore justified and consistent. For the sake of regulatory clarity, it is specified that the specification also covers cultivated edible mushrooms, excluding wild mushrooms.
