4. 2025/0753/CZ - I10 - Metrology

5. Draft Measure of a General Nature No: 0111-OOP-C101-26 laying down metrological and technical requirements for specified measuring instruments,

including test methods for type approval, verification and checking of specified measuring instruments:
'multi-dimensional measuring instruments'

6. In the Czech Republic, multi-dimensional measuring instruments are specified measuring instruments that are subject to type approval and verification.

7.

8. The regulation lays down the metrological and technical requirements for these specified measuring instruments, including the test methods for type approval and verification of specified measuring instruments.

Keywords:

measuring instrument, multi-dimensional measuring instruments, 3D measurement

9. Multi-dimensional measuring instruments may be placed on the market and put into service in the Czech Republic as specified measuring instruments pursuant to Act No 505/1990 on metrology, as amended. Pursuant to this Act, specified measuring instruments are instruments that are included in the list of the types of specified measuring instruments (Decree No 345/2002) and, at the same time, intended (by the manufacturer/importer) for measurements of relevance to the protection of public interests in areas of consumer protection, contractual relations, imposition of sanctions, fees, tariffs and taxes, health protection, environmental protection, occupational safety, or the protection of other public interests protected by special legislation. This is therefore a purpose similar to the one defining specified products – non-automatic measuring instruments and scales pursuant to Directives 2014/31/EU and 2014/32/EU. The requirements of this legislation do not apply to measuring instruments not placed on the market in the Czech Republic for the above purposes, defined by Act No 505/1990 on metrology, as amended.

The purpose of this notified legislation is to lay down metrological and technical requirements for these specified measuring instruments. This legislation also stipulates tests for type approval and verification of specified measuring instruments of this type.
