4. 2025/0520/DK - B10 - Construction materials

5. Order on marketing and market monitoring of construction products

6. The order encompasses construction products.

7.

8. The order is based on the Construction Products Regulation from 2011. The order is being updated in connection with the revised Construction Products Regulation from 2024.

The revised Construction Products Regulation is replacing the current regulation over a period of 10-15 years. Both regulations will therefore apply concurrently for a number of years.

The current regulation based on the Construction Products Regulation from 2011 is maintained and revised with amendments as a result of the revision of the Construction Products Regulation from 2024. The order is being revised on the basis of the transitional arrangements between the two regulations. In addition, the order is being revised to remove redundant requirements.

Notification has also been sent for the Order on the marketing and market monitoring of construction products in accordance with the revised Construction Products Regulation (new order based on the Construction Products Regulation from 2024).

9. The wording of the order is intended to be closer to the text of the regulations than is the case with the current order. A principle of maintaining applicable law has also been applied.

The powers of market regulators have been revised so that provisions set out in the revised Construction Products Regulation or Construction Act are not repeated in the order. A number of provisions have therefore been deleted from the order. This does not mean that requirements are removed, but that the different texts are better aligned.

It has also been clarified that the approval system under market control is the Danish scheme for construction products that come into contact with drinking water (GDV), which has a different legal basis.
