5. Draft Regulation of the Minister of Energy on the method of sampling liquid fuels and liquid biofuels.

6. Liquid fuels

Liquid biofuels

Sampling methods

7.

8. The Minister of Energy, pursuant to the authorisation conferred under Article 19(1) of the Act of 25 August 2006 on the system for monitoring and controlling fuel quality, is obliged to determine methods for sampling liquid fuels and liquid biofuels, taking into account the methods set out in the relevant standards.

The draft regulation defines the method for sampling liquid fuels and liquid biofuels intended for the propulsion of vehicles.

9. One of the main objectives of this regulation is to define the method of sampling for a new type of liquid biofuel, i.e. liquid biohydrocarbons, which are used as stand-alone fuels and take the form of paraffinic diesel. The inclusion of paraffinic biohydrocarbons in the Fuel Quality Monitoring and Control System will enable the production of paraffinic biohydrocarbons in Poland and their placing on the market. In addition, the draft required legislative and editorial adjustments.
