5. Draft decree regulating the direct sale and short marketing channels of agri-food products in Castilla y León.

6. Food products

7.

8. The purpose of this Degree is to:

- Encourage the sale through alternative marketing channels of the agri-food products included in their direct sales and short marketing channel options.
- Lay down the procedure for prior notification and the registration system of primary producers participating in sales through alternative channels.
- Establish an identification system for agri-food products marketed through alternative channels.
- Promote training for all alternative channel operators.

9. Regulation (EU) 2021/2115 of the European Parliament and of the Council of 2 December 2021, which establishes rules regarding support for strategic plans to be drawn up by Member States under the common agricultural policy (CAP Strategic Plans), considers that, "it is necessary to improve the position of farmers in the value chain, in particular by fostering forms of cooperation that benefit farmers and encourage their participation, as well as by promoting short supply chains and improving market transparency'.

The decree is a tool for bolstering the agricultural and livestock sector in the face of the need to increase food production, while respecting the parameters of sustainability. Likewise, the regulation of direct sales and short marketing channels of agri-food products in Castile and Leon is a way of adapting agricultural productions to the demands and tastes of consumers, as a means of generating increasing demand for very specific products, that also favour local agriculture and livestock farming and contribute to the revitalisation of local markets, as a means of bolstering producers' incomes and promoting food safety.
