Helsinki [date] [Month] 2025

The Finnish Medicines Agency Fimea's Decision on the List of Medicinal Products

List of substances used as and considered to be medicinal products

The Finnish Medicines Agency Fimea has decided to adopt the following list of medicinal products pursuant to section 83 of the Medicines Act of 10 April 1987 (395/1987):

Section 1

Purpose of the list

This Decision contains a list of **substances** and **herbs used and considered to be medicinal products** in Finland. The list of medicinal **substances** is drawn up taking into account the provisions of sections 3 and 5 of the Medicines Act.

'Medicinal product' refers to a preparation or substance for internal or external use that is intended to cure, alleviate or prevent a disease or its symptoms in humans or animals. Medicinal products are also considered to include substances or combinations of substances for internal or external use that can be used to restore, correct or modify the physiological functions of humans or animals by means of their pharmacological, immunological or metabolic impact, or to diagnose the state of health or cause of a disease.

A medicinal substance is a substance that affects the body, defined in detail chemically or by other scientific methods and used in the manufacture of a medicinal product or as a medicinal product as such.

The list of medicinal **substances** is not exhaustive. **Any** substances and herbs, **which are not included in this list but** which meet the definition of a medicinal product in the Medicines Act, are medicinal products.

Not all products containing a substance listed in the list of substances necessarily meet the definition of a medicinal product. A substance

31.1.2025Draft
Register number
FIMEA/2024/003251

listed in the list of medicinal **substances** may be covered by other legislation, if specifically provided for.

In the assessment of an individual product, the following are taken into account: the presentation, composition, pharmacological properties, uses, extent of application, consumer information, and hazard arising from the use of the product. If necessary, the Finnish Medicines Agency Fimea decides under section 6 of the Medicines Act whether a substance or preparation should be considered a medicinal product.

Annex 1 lists the substances used for medicinal purposes in Finland. The pharmaceutical salts and esters of medicinal substances are not included. A medicinal substance and its salt **and ester** form are **similar in effect**. The **listed** substances are mainly active pharmaceutical ingredients of authorised products and special permit products.

The substances in Annex 1A are medicinal substance analogues and prohormones.

Annex 2 lists the herbs used for medicinal purposes in Finland.

Section 2

The following are controlled as medicinal products:

- 1) substances listed in Annex 1 to this Decision as well as their salts and esters **in accordance with section 3, subsection 1 or 2 of the Medicines Act;**
- 2) doping substances listed in the Government Decree on Doping Substances referred to in chapter 44, section 16, subsection 1 of the Criminal Code of Finland; and
- 3) substances listed in Annex 1A to this Decision, which are always treated in the same way as medicinal products supplied only on prescription on the basis of their effect.

Section 3

In addition, the following substances or preparations are controlled as medicinal products **when** they are **used** for the purposes referred to in section 3, **subsection 1** of the Medicines Act:

- 1) herbal medicinal products listed in Annex 2 to this Decision and active substances produced from them, which are herbal preparations (including

31.1.2025Draft
Register number
FIMEA/2024/003251

extracts, tinctures and juices) and similar active substances of animal origin and medicinal preparations produced from them;

2) certain preparations or substances that differ from normal medicinal products in terms of their physical state, composition, production method or mechanism of action. These include radioactive medicinal preparations, allergenic preparations, vaccines, medicinal gases, advanced therapy medicinal products as well as medicinal products derived from human blood or blood plasma; and

3) vitamin and mineral preparations.

Section 4

This Decision enters into force on **[date] [Month] 2025**.

This Decision repeals the **Decision of the Finnish Medicines Agency Fimea on the List of Medicinal Products of 21 March 2022 (183/2022)**.

Notification of the draft list of medicinal products has been made to the Ministry of Employment and the Economy. The notification has been made in accordance with Directive 98/34/EC of the European Parliament and of the Council, as amended by Directive 98/48/EC.

List of Medicinal Products 2025, ANNEX 1A, draft, 3 December 2024

ANNEX 1 A Finnish name	Swedish name	English name
Finskt namn	Svenskt namn	English name
1,3-DMAA , 1,3-dimetyylibutylamiini	1,3-DMAA , 1,3-dimetyylibutylamiini	1,3-DMAA , 1,3-dimetyylibutylamiini
11-ketotestosteroni	11-ketotestosteron	11-ketotestosterone
19-norandrost-4-en-3-ol-17-oni	19-norandrost-4-en-3-ol-17-on	19-norandrost-4-en-3-ol-17-one
1-dehydroandrenosteroni	1-dehydroandrenosteron	1-dehydroandrenosterone
1-DHEA	1-DHEA	1-DHEA
4-DHEA	4-DHEA	4-DHEA
4-fluorifenibuutti	4-fluorophenibut	4-fluorophenibut
5-metyyliheksan-2-amiini	5-metylhexan-2-amin	5-methylhexan-2-amine
6-asetyylikodeiini	6-asetylkodein	6-acetylcodeine
7-keto-DHEA, 7-ketodehydroepiandrosteroni	7-keto-DHEA, 7-ketodehydroepiandrosteron	7-keto-DHEA, 7-ketodehydroepiandrosterone
ACE-031	ACE-031	ACE-031
Adipotidi (FTPP)	Adipotid (FTPP)	Adipotide (FTPP)
Adrenosteroni	Adrenosteron	Adrenosterone
Aildenafilii	Aildenafilfil	Aildenafilfil
Aildenafililitioni	Aildenafilfition	Aildenafilfithione
Aleksamoreliini	Alexamorelin	Alexamorelin
