4. 2026/0201/RO - I20 - Pressure equipment, gas appliances and boilers

5. PT C 15-2025 - HYDROGEN SUPPLY INSTALLATIONS

6. Regulation of hydrogen refuelling

7.

Directive 2006/123/EC on services in the internal market

Other

Provision of services on the Romanian territory is allowed under the conditions described above

The technical regulation fosters an environment conducive to decarbonisation policy

The measure is proportionate to the purpose of decarbonisation policies

8. This technical prescription establishes the conditions and technical requirements for installation, mounting, commissioning, authorization of operation, use/operation, service, technical supervision, technical inspection in use, repair, maintenance works, as well as technical inspection in use to estimate the remaining life of hydrogen supply installations.

9. There are currently no regulations governing hydrogen refuelling installations.

The absence of a technical prescription regulating the use of hydrogen supply installations leads to:

- the risk that the National Hydrogen Strategy, adopted as part of the National Recovery and Resilience Plan (PNRR), will not be implemented;

non-compliance with Regulation (EU) 2023/1804 of the European Parliament and of the Council of 13 September 2023 on the installation of infrastructure for alternative fuels, which also refers to hydrogen refuelling installations;

- the impossibility of authorising the operation of hydrogen refuelling installations;

- the impossibility to refuel vehicles using hydrogen as an alternative fuel;

- possible construction of hydrogen refuelling stations under arbitrary conditions which do not ensure their safe operation.
