4. 2026/0106/DK - N30E - Gas

5. Order on the Safety of Gas Installations

6. Gas installations for flammable gas and the pipelines, equipment, etc. of these installations.

7.

8. The Order on the Safety of Gas Installations contains safety requirements for the establishment, modification, operation and maintenance of gas installations that contain or use inflammable gas.

Gas installations are defined as installations used for the production, supply, extraction, upgrading, blending or filling of gas. Also included are stations or installations for the treatment, storage, measurement and regulation of pressure and compression.

It is therefore only these facilities and the pipelines belonging to them that are regulated in the order.

The order is published in accordance with the requirement in Article 10(1) of Directive (EU) 2024/1788 of the European Parliament and of the Council of 13 June 2024 on common rules for the internal markets for renewable gas, natural gas and hydrogen, amending Directive (EU) 2023/1791 and repealing Directive 2009/73/EC.

9. There is no EU regulation for the establishment, operation and maintenance of gas installations, only for the components commonly used to build gas installations.

In view of the dangers of inflammable gases, it is necessary to lay down safety requirements for both the establishment and maintenance of gas installations, depending on the type of gas used in the installation. In addition, it is necessary to require safety procedures for the operation of these installations.
