5. Ordinance of the Upper Austrian Provincial Government laying down detailed rules for the automated system for transmitting or reporting data for the collection of the tourist tax (Upper Austrian Tourist Tax Data Transmission Ordinance 2025)

6. Definition of a uniform automated system for transmitting data from guest accommodation to municipalities.

7.

8. In future, the transmission of the data for the collection of the tourist tax is to be carried out using a uniform automated system.

In order to ensure the automated transfer and further processing of the data, it should be transmitted as an 'XML file' or 'CSV file'.

9. As part of the tourist tax collection process, guest accommodation providers (commercial accommodation establishments, campsites, private guest accommodation providers and special hospitals for medical rehabilitation or healthcare) must transmit data about their guests to the municipalities. In future, this is to be done through a uniform automated system.

The aim of this digitalisation project is to simplify administrative processes and reduce workloads, thereby also reducing costs in the long term.

A further aim is to reduce current problems during the collection process (failure of guest accommodation providers to transmit data).

This is also expected to provide a better overview of the guests staying in Upper Austria. This can be beneficial, for example, in the event of a crisis.

The widely used formats 'XML' and 'CSV' should be used for transmission.
