4. 2025/0453/AT - C40A - Pesticides and pesticide residues

5. Provincial Act with which the Upper Austrian Soil Protection Act of 1991 is amended

(Upper Austrian Soil Protection Act 2025 Amendment)

6. Plant protection products

7.

8. Records on the use of plant protection products shall be kept in accordance with the requirements of Regulation (EC) No. 1107/2009 and Implementing Regulation (EU) 2023/564, except in the case of non-professional use of plant protection products.

In order to simplify the administrative burden combined with the nationwide availability of all technical requirements, professional users of plant protection products (and thus indirectly the providers of common farm management software systems) should be given a sufficiently long timeframe (use until the end of 31 December 2029) for the mandatory conversion of records of uses of plant protection products by 31 January of the following year.

9. The intended amendments to the Upper Austrian Soil Protection Act of 1991 aims to make appropriate, effect-oriented and necessary adjustments and provide for legal adjustments and deregulation measures as elements of better regulation. Any required amendments to references are to be made in addition to changes required by EU law to harmonise and simplify the administrative burden and thus the administrative processes, the introduction of digital and practical provisions, along with the elimination of balance sheet, reporting and programme reimbursements. This draft law makes use of the possibility under EU law to extend certain recording or conversion deadlines in the Upper Austrian Soil Protection Act of 1991 (optional accompanying regulation to Implementing Regulation (EU) 2023/564 to reduce administrative burden).
