

English version New TEK17 section 14-x

Main proposal:

New TEK17 section 14-x:

§ 14-x Requirement for facilitation of solar energy systems

(1) Commercial buildings with a heated gross internal area of more than 500 m² must be facilitated for future installation of solar energy systems. The requirement does not apply if the building is constructed with a solar energy system.

(2) The requirement in the first paragraph does not apply if the building or its location is unsuitable for the use of solar energy systems.

Alternative proposal:

New TEK17 section 14-x:

§ 14-x Requirement for solar cells or locally produced energy

(1) Commercial buildings with a heated gross internal area of more than 500 m², outside areas designated for agriculture, nature, outdoor recreation and reindeer husbandry (LNFR) in the municipal land-use plan, must have a photovoltaic system or other locally produced energy.
