5. Order on pressure gauges intended for the inflation of motor vehicle tyres

6. Order on pressure gauges intended for the inflation of motor vehicle tyres

7.

8. This Order defines the regulated uses as well as the metrological design and manufacturing characteristics of pressure gauges used for the inflation of motor vehicle tyres.

9. The purpose of regulating this category of instruments is to improve road safety.

Accurate tyre inflation to the pressures prescribed by manufacturers improves the road handling and braking of vehicles. Accordingly, if tyres are under-inflated, they may burst as a result of overheating, causing accidents.

This Order is also intended to replace earlier texts concerning this category of instruments that have become obsolete and which will cease to have effect or will be repealed by this text.
