4. 2025/0525/EE - I10 - Metrology

5. 'Mandatory Areas of Application of Metrologically Controlled Measuring Instruments with Exceptions, List of Measuring Instruments Subject to Metrological Control, Accuracy Requirements, List of Verification Validity Periods, Accuracy Requirements, Verification Validity Periods and Metrological Control

6. Measuring instruments Water meters.

7.

8. Regulation No. 65 indicated in the title, together with the Metrology Act, governs the area of metrological control of measuring instruments in Estonia. The regulation lays the down areas of application for types of measuring instruments, where the use of metrologically controlled instruments is mandatory.

The draft extends the verification validity periods for electromagnetic and ultrasonic water meters to 10 years. The applicable verification validity period is 5 years.

9. The amendment will reduce the costs for water undertakings to perform operations related to verification, including personnel costs.

Control over the accuracy of electromagnetic and ultrasonic water meters is maintained through verification but the technological design allows for this to be done at longer intervals.

10. References to related legislation: The basic texts were forwarded with an earlier notification:
