4. 2025/0648/BE - C00A - AGRICULTURE, FISHING AND FOODSTUFFS

5. Ministerial Decree amending the Ministerial Decree on low-ammonia-emission barn systems adding a measure to reduce ammonia emissions

6. An ammonia emission reduction system that decreases the emitting surface area on the surface of manure through the use of floating balls.

7.

8. Flanders is making significant efforts to reduce ammonia emissions by the agricultural sector. Ammonia emission reduction measures play an important role in this. For this purpose, a list of ammonia emission reduction measures is included in the regulations and the way in which ammonia emission reduction measures can be included in the regulations is also included in the regulations.

This amendment to the decree now also allows for the use of floating balls on the surface of manure for cattle.

9. Low-ammonia-emission animal housing systems reduce the amount of ammonia that evaporates from a farm animal building.

These systems also often affect the odour and particulate matter emissions from farm animal buildings.

Flanders is making significant efforts to reduce ammonia emissions by the agricultural sector.

Low-ammonia-emission animal housing systems that work correctly and achieve high removal efficiency are essential in this regard.
