Regulation of the Minister of Agriculture, Fisheries, Food Security and Nature of..., No. WJZ/95895732, amending the Regulation on National Subsidies related to Economic Affairs (EZ), Agriculture, Fisheries, Food Security and Nature (LVVN) and Climate Policy and Green Growth (KGG) and the Regulation on the opening of EZ, LVVN and KGG subsidies 2025 in connection with the introduction and opening of the subsidy

6. Subsidy scheme for hygiene installations and drying installations

7.

8. Articles 2.x.2, 2.x.6 and 2.x.9 and Annex 2.x.1 of the subsidy module may contain de facto technical regulatory requirements.

Pursuant to Article 2.x.2 of the subsidy module, a subsidy may be granted for the design of a hygiene installation and drying installation. Article 2.x.1 states that a hygiene or drying installation refers to a manure processing system based on an operational principle and basic technique as described in Annex x, Table 1 or Table 2. This annex contains an overview of the various operational principles and basic techniques that must be complied with in order for a hygiene or drying installation to be considered eligible for a subsidy under this subsidy scheme.

A provision on reciprocity has not been included because it is not relevant here.

9. The aim of the subsidy scheme is to encourage intermediary companies to invest in a hygiene installation and/or drying installation in order to enhance the quantity of exportable manure, thereby decreasing manure market pressure.

The requirements set out in the scheme and the operational principles and basic techniques stated in Annex 2.x.1, which must be used if a hygiene installation or drying installation is to be considered such under this subsidy scheme, are non-discriminating and appropriate and necessary to achieve the objectives. This means to actually produce a final product that can be exported, to actually stimulate hygiene or drying processes in a manner consistent with future manure policy and also to contribute to environmental protection. The intended requirements are proportional and do not go beyond what is necessary to achieve the aforementioned objectives. Regarding the basic techniques, it is important to have the option to choose a different technique in order to create a hygiene or drying installation, and therefore a subsidisable investment project. This basic technique will need to be validated in accordance with the Regulation for Animal By-products. A subsidy scheme is the least restrictive means to achieve the aforementioned objectives.
