4. 2025/0683/FR - C40C - Chemical fertilisers

5. Order amending the Order of 5 September 2003 laying down the compulsory implementation of standards

6. Inorganic fertilisers

7.

8. The purpose of this Interministerial Order is to make the application of an addition to a standard on inorganic fertilisers compulsory

This measure is a derogation from the marketing authorisation referred to in Article L255-2 of the Rural and Sea Fisheries Code and set out in Article L255-5(1).

The purpose of this draft is to make the application of amendment A2 to the existing Standard NF U42-001-1 (October 2011) on inorganic fertilisers compulsory:

Since Regulation (EC) No 2003/2003 has been repealed and replaced by Regulation (EU) No 2019/1009, this amendment seeks to update the approved Standard NF U 42-001-1:2011 and its amendment A1, both of which refer to this repealed Regulation. Particular attention has been paid to the requirement that CE-marked fertilisers used as inputs comply with the requirements for the components indicated in the 'Method of production and main component(s)' column of the type designations indicated in Standard NF U42-001-1/A2.

9. The additions to existing standards reinforce those standards, which are used in particular by producers, users and official control bodies. Their purpose is not to establish a selection that meets commercial quality criteria; they are intended only to define and characterise each type of fertiliser in order to help users to distinguish and choose between them without ambiguity.

For public health reasons, the standards for fertilising materials and growing media are made compulsory. Amendment A2 to Standard NF U 42-001-1 should therefore be made compulsory.
