4. 2025/0692/PL - C50A - Foodstuffs

5. Draft Regulation of the Minister of Health amending the regulation on enriching substances added for foods

6. Addition of celandine, goldenseal, swallowwort, greater celandine (*Chelidonium majus* L.) to the list of substances other than vitamins and minerals prohibited in the production of food articles.

7.

Regulation (EC) N° 1925/2006 concerning the addition of vitamins and minerals and certain other substances to foods: Article 12

In this draft regulation, Poland makes use of the possibility provided for in Article 11(2) of Regulation No 1925/2006 to prohibit the use of substances other than vitamins or minerals (i.e., celandine, goldenseal, swallowwort, greater celandine (*Chelidonium majus* L.)) in the food production.

In accordance with provisions of Regulation No 1925/2006, the envisaged provisions may be applied only six months after the notification and provided that the European Commission does not express a negative opinion. It is, therefore, necessary to notify the draft regulation.

8. The draft regulation amends the Regulation of the Minister of Health of 13 March 2024 on food additives (Journal of Laws, item 420) by adding celandine, goldenrod, swallowwort, greater celandine (*Chelidonium majus* L.) to the annex to the regulation, which specifies the list of substances other than vitamins and minerals prohibited in the production of food articles.

9. Celandine, goldenseal, swallowwort, greater celandine (*Chelidonium majus* L.) is added to the list of substances other than vitamins and minerals prohibited in the production of food articles, as this plant contains naturally occurring components that may pose a risk to human health if used in the production of food, including food supplements. The regulation is issued to ensure health safety of consumers.

The evaluation of plant substances and raw materials is performed in Poland by the Food Supplements Team, which carries out risk assessments on the basis of current knowledge, scientific data, activities of other countries of the European Union, or positions of the bodies of the European Union, which constitute an objective source of knowledge concerning risks arising from the use of these substances and plant materials in the manufacture of foods, including food supplements.

As a result of adding celandine, goldenseal, swallowwort, and greater celandine (*Chelidonium majus* L.) to the list, it will be prohibited in the production of food articles, including dietary supplements, and consequently it cannot be used as an ingredient in them. The adoption of such a solution is appropriate and necessary to achieve the objective of protecting the health of consumers.
